

Modular Turn Table Concept

This Turn Table Fixture is capable of adjusting it's angled top surface, and rotating in sync with a Fanuc Robot System. Included are general dimensions, high level features, and explanations of design choices.

Measurements are in inches.

Pistons are Hydraulic Crank Jacks of choice. Capable of 1000IB lifts.

Front of Turn Table top plate sits on a hinge.

Base Plates are 1/2" Sheet Steel, and should be dimensioned to provide space for the Inner Barrel mounting system to bolt on.

Platform rotates on a high capacity Lazy Susan. Rotation is provided by additional Fanuc Servo.
